PATENT COOPERATION TREATY

From the INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

То:			PCT		
CHAS.HUDE A/S H.C. Andersens Boule DK-1780 Copenhager DANEMARK	Sagatype 1	1 FEB. 2005	NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (PCT Rule 71.1)		
	AS 400	Til hvem Zuj	Date of malling (day/month/year)	21.02.2005	
Applicant's or agent's file re 79485	ference		IMPORTANT NOTIFICATION		
International application No. PCT/DK2004/000521		International filing date (d 02.08.2004	day/month/year)	Priority date (day/month/year) 05.08.2003	
Applicant THOMSEN, Jorn Oddershede					

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET) International application No. PCT/DK2004/000521

Re Item V.

- 1 The following documents are referred to in this communication:
 - D1: US-A-6 017 901 (KHAN RIAZ ET AL) 25 January 2000 (2000-01-25)
 - D2: WO 96/35720 A (KHAN RIAZ; KONOWICZ A PAUL (GB); FIDIA ADVANCED BIOPOLYMERS SRL (IT);) 14 November 1996 (1996-11-14)
 - D3: US-A-4 746 504 (GREENMAN BENJAMIN ET AL) 24 May 1988 (1988-05-24)
 - D4: EP-A-0 480 189 (ALTERGON SA) 15 April 1992 (1992-04-15)
 - D5: US 2003/099718 A1 (BURRELL ROBERT EDWARD ET AL) 29 May 2003 (2003-05-29)
 - D6: DATABASE WPI Section Ch, Week 199816 Derwent Publications Ltd., London, GB; Class B04, AN 1998-177283 XP002296635 & RU 2 087 148 C1 (TRETYAKOV V V) 20 August 1997 (1997-08-20)

2. Novelty

The documents D1-D5 disclose compositions suitable for use as a supplement which contain hyaluronate (a material derived from cartilage) and a silver salt (see D1-D5: passages cited in search report). The subject-matter of claims 1 and 11 differs from the teaching of these documents in that cartilage is used. Therefore, the present application meets the criteria of Article 33(1) PCT, because the subject-matter of independent claims 1 and 11 is new in the sense of Article 33(2) PCT.

3. Inventive Step

The present application meets the criteria of Article 33(1) PCT, because the subject matter of claims 1 and 11 is considered to involve an inventive step in the sense of Article 33(3)PCT.

Document D6, which is considered to represent the most relevant state of the art to the subject matter of claims 1 and 11, discloses compositions containing colloidal silver. The compositions are used for treating distemper and parvoviral enteritis in livestock animals such as mink (see D6; abstract). The subject-matter of independent claims 1 and 11 differs

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/DK2004/000521

from the disclosure of D6 in that a material derived from cartilage is added additionally to the composition. The effect of this addition is that smaller amounts of silver compound can be used in the compositions while retaining its therapeutic properties. Therefore the objective problem solved by the compositions of the present invention is a means of reducing the required concentration of silver in supplements. The means by which this problem is solved, namely the synergy provided by the addition of cartilage is not suggested by the available prior art.

4. Dependent claims

Claims 2-10 and 12 are dependent on claims 1 and 11 respectively and as such also meet the requirements of the PCT with respect to novelty and inventive step.
